NUMBER 32

Shall We Have A Reserve Army Unit

Some say yes, some say not, most don't know. Across Canada, in cities and towns, many smaller than Raymond, Reserve Army units are organized and are training. This service takes men from 17 to 55 years, those too young to join up, many whose physical categories are not high enough for service in the active forces and the group from 45 to 55 who are too old for active service. It is intended that during the year enough parades are held, at regular periods to equal forty days training, and 14 days of this time is expected to be spent in military camp with other similar units.

Reserve units are issued regular army kit including rifle, and receive lectures, instruction and drill in regular army subjects. These reserve units furnish many partially trained recruits for active service besides supplying a home guard just in case.

It is a nice mark of patriotism to have a home guard organized and will give our business men and others a chance to serve. A number have expressed a desire to join, and if you are interested see I. Kitchen, Jno. Landysheff, or leave your name at this office so it can be added to the list.

The Lethbridge Post Office Clock will be in a blackout for the duration. This is to conform with recent orders received from Govt. Officials at Ottawa.

Mr. S. I. May

Dear Editor

I thought I would drop you a few lines at this time and would ask you to kindly mention in your paper, that I wish every one a Merry Xmas, a Happy New Year and better times ahead. We are doing better than I expected to and hope this good work that has now been started will be kept up and get this war over. I expect it will take some time yet, but we have at least got Hitler on the run and it has been a good tonic to us all.

There is one thing we do not like in this country and that is the Blackouts. Yes it can save get dark and one has to be sure he knows where he is going else he will get lost. The

J. E. Meeks shipped out four car loads of beef cattle last Saturday.

Elders Gerald Gibb and Jas. S. Anderson were the speakers in the Raymond 2nd Ward last Sunday evening. The Junior Girl's Chorus, directed by Ira McBride was also present and rendered a very fine program of singing.

miles of winding roads and lanes are very good for the first few miles, but after the first six hours of marching, you just don't take any notice of the country, you just keep picking up your feet and drop them down again and just keep going and not caring. We find the hard surfaced roads are very hard on our feet and I would rather walk on the dirt roads. The country has had a wonderful harvest and the way they are preparing for next year they will be better prepared than ever. It was good to see the fruit on the trees and the country on the whole is very beautiful, but I still think Canada is the only place and I can say I will be glad to be able to see the Rockies again. Of course I should mention the (rainy season) you people do not get all the rain, but you do not get the green pastures like they do here. I am not sorry for coming over here and hope I can do some good for us & some harm for old Jerry before I come back. I am sure the Canadian soldiers have laid around enough and we want to get going. I think the people here have taken things fine & Jerry cannot beat people with such a spirit. Waste of anything is a criminal offence, and one has to be sure that nothing is wasted. Lights, water, fuel of all kinds must be carefully used and we are asked to not light a fire until absolutely necessary. We feel the cold very much and could do with a fire most of the time and the English people say it's warm.

You can see every kind of representative from all the countries of the world in uniform here & it is wonderful to see the faith they have in Britain, and that she will finally return their country and homes to them.

Well S.I. I have said all I can think of at this time. All the Raymond boys with me are fine and in the best of health and though we are rationed for food it's remarkable to see how the boys put on weight.

Yours Truly

Sam Dyson.

Has It Been Worth It?

(Editorial)

For the past three years and three months, Canadians have been asked by their Government to "Work—Save—Lend for Victory." People of Canada have responded exceptionally well in purchasing War Savings Stamps and Certificates, as well as Victory Bonds, and assisting in every war effort of whatever nature. We are of the opinion that at times nearly everyone has been more or less fed up and have asked themselves, and quite honestly, "Is it Worth It?"

During the past three years Canada, with the other Allied nations has gone through some dark days and some bitter disappointments. There have been times when it seemed almost certain that the Axis were going to overcome us, but they didn't, and we took a deep breath and went at it again.

At Dunkerque, England, Canada and the Anzacs stood alone and were whipped. Divine Providence opened an avenue of deliverance and most of our men got out, not without heavy loss, but lucky indeed. Then we held our breath. Would Hitler invade England? If he did how long before he would make for Canada? Certainly we were unprepared in every way, but, another wonder, Hitler did not attack and we breathed again. He turned on Russia, and an immortal chapter of the war has been written by the never-say-die spirit of the Russians. They still stand.

Then Japan started south and overran almost overnight, hundreds of islands, taking Singapore, Manila, all the Philippines, the Dutch East Indies, Borneo and camping in the doorway of Australia.

The faith of the Allies never faltered. England took her bombing, with a promise to return the compliments with interest. We received a set back in Africa, subs were sinking our shipping and the skies were really black. The United States entered the war and our hearts beat lighter. Then armament production increased, not only in quantity but also in quality. Our forces on land, on sea and in the air became greater in number and our confidence increased as men and supplies commenced arriving in ever increasing numbers in England for final training.

Today, Russia is driving the Nazis back with terrible losses. In Africa the Axis forces are making a final stand in Libya and Tunisia, with a total Allied victory appearing almost certain. In the islands adjacent to Australia troops of Aussies and United States with Air force are backing the Japs up gradually and steadily forcing them to narrow beaches and winning back what was taken by Japan a few months ago.

The war is a long way from being over, but there is reason for hope and Allied nations and people are glad that production and manpower have been co-ordinated and organized so that it begins to look as if we could take the offensive and return some of the medicine we have had to take.

Has it been worth it? There is not a freedom loving Canadian but what will say YES, and more. Not only fighting to maintain our own freedom, but also to assist such brave nations and people as France, whose sailors scuttled a \$309,-

000,000 Navy, the Netherlands, Belgium, Poland, Czechoslovakia, Denmark and the other occupied nations who though tortured starved and oppressed have never ceased to fight back by sabotage, arson, with guerrilla armies and every other way so as to hinder the Axis moves and progress all looking toward a day of deliverance when their national spirit may again assert itself.

If we gained nothing for our selves but were still able to reinstate these liberty loving people it would still be worth it and while we are helping them to resist dictatorship and tyranny we are guaranteeing the continued peace, progress and prosperity of the freedom loving democracies of the world and our own nation.

Yes it has been worth all we have done and all we shall be asked to do to enjoy liberty and freedom in a happier and more prosperous world.

Louis Brandley received his shipment of feeders last week.

Y. T. SHORTS

Well, "Believe it or not," as Ripley says, but we had more men than girls out on Monday night and two men had to do the dance together.

The class is showing improvement in style, form and performance. Looks like we will have a few good acts for the display next February or March. Ronald, Rowan and Verle have the backward roll and will soon have the "Extension." Fundamentals are uniformly good.

The "Guard the Pop" game proved to be a disappointment. Rowan relaxed his guard duty for a second, and Wick let fire a bullet like shot that made the bottle literally explode. Winners only had one bottle to drink.

Girls classes have finally started to follow the leader's advice and take the exercises in their bare feet. He says it is far better for health. They try to make it appear that they follow his advice, but we know that they can't get rubber shoes. Well, the war has one beneficial effect any way!

Welling center is attractive; a few new ones each Wednesday. Buelah Henderson's table cloth attracted a number of "ah's" and "oh's" after she finished stenciling it Wednesday.

The girls are making purses to hold everything they take large enough and strong enough with them on a vacation.

Welling has the "Danish Four Dance" now so they can get through it without any casualties. Even the "Ghost" was able to go through without a mistake. Had one near mishap in the "Ponsette." He used his tumbling ability and rolled slowly to a stop against the benches after he was tripped.

Welling is having an "Open House" one week from next Wednesday. An "Open House" is just a way of saying that we want a crowd of people to come to a party. We don't dress up in our best, but come prepared to play games, dance and eat.

Buelah has charge of the lunch, so if you don't know what to bring, you may call her. "Open House" is particularly for people who haven't been coming to Youth Training. See you at Welling, December 16, 7:30.

Bank of Montreal Issues Strong Reports with Record Assets And Public Deposits

Resources at \$1,175,000,000 — Deposits, \$1,064,000,000, Surpass — Billion Mark for First Time — High Liquid Position

PROFITS — DOWN SLIGHTLY — EQUAL 4.31% OF SHAREHOLDERS' EQUITY

With deposits passing the billion dollar mark for the first time in its history of a century and a quarter, and with assets at an all-time high, the Bank of Montreal in its annual report, presents an impressive wartime record. Increased holdings of government and other bonds are a direct reflection of participation in the government industry have been reduced. The ratio of quickly available assets substantially increased, as the bank's strong position was well maintained. Extended banking operations resulted in a moderate expansion of earnings but higher taxes paid into the federal treasury brought about a sizable reduction in net profits.

The total of assets as at the end of the fiscal year October 31st was \$1,175,319,231, showing an increase of \$128,767,752 over the preceding year, which, at \$1,046,551,479 was itself a record up to that time. Liabilities to the public totalled \$1,089,526,216, the excess of assets being \$76,793,015, which represents the shareholders' equity. The bank's strong position was further shown in the total of quickly available assets, which at \$896,935,228, equal \$1.65 per cent of all liabilities to the public.

The bank's record deposits at \$1,064,645,439, showed an increase, compared with the preceding year, of \$136,257,550. The bulk of this increase was in Canada, the high general level of employment and increased farm income being reflected in a total of \$920,996,417, which was

larger by \$121,885,542 than a Canadian record of \$119, year before; deposits outside 277,013 to \$133,649,022.

That the large available funds were employed extensively in meeting the war-time needs of the Fed. government is indicated in the fact that holdings of government and other bonds increased by \$185,094,854—from \$498,740,536 to \$683,835,390. at the same time commercial and other loans in Canada were reduced from \$254,427,218 to \$205,232,367 and loans outside Canada from \$21,271,754 to \$16,121,869. The reduction of commercial loans may be taken as an indication of the curtailment of financial requirements of industry, engaged to a large extent in war production and now being financed by the government. The small current public interest in stock trading is seen in a further decline in call loans in Canada to \$1,920,538 from \$4,472,437. Call loans elsewhere were reduced to \$14,289,715 from \$15,569,284.

Profits for the year, after demerit taxes at \$3,283,018 showed a reduction of \$154,008 and compared with \$3,437,026 of the preceding year. The figures are after making appropriations to contingent reserve, and after making full provision for bad and doubtful debts. The federal (of which \$72,360 is refundable taxes increased to \$2,539,374 under the provisions of The Excess Profits Tax Act) from \$2,242,905 in the previous year, this increase being substantially greater than the decline in profits shown. The profits represent 4.31 per cent on the shareholders' equity as compared with 4.51 per cent, shown a year ago.

NEW SYSTEM OF SECURITY FOR BRITAIN

London. In the most sweeping plan of government-sponsored social security ever put forward in any country, Sir William Beveridge's planning commission proposed today that Britain establish a new ministry of social security and virtually double the present expenditure of \$1,300,000,000 annually on unemployment, health insurance and pensions.

The broad program, which Sir William, a noted economist, acknowledged was "in some ways revolutionary," covers literally from the cradle to the grave, providing among other things for public assistance grants for births — even for unmarried mothers — marriages and up to \$80 for funerals.

Is the foregoing a prelude to the establishment of a new order throughout the world? Till some plan be evolved, without any great sacrifice to anyone, whereby people are guaranteed food, shelter and clothing, from the cradle to the grave?

Who, more than the parents and grandparents of today's youth are entitled to the necessities and comforts and a few of the luxuries of life for the part they have played in the progress of the world and the pioneering of new frontiers.

OPTOMETRIST AT SCHOOLS

As a part of their Social Service program, the Lions Club has recently had an optometrist at Raymond's schools and pupils with defective or impaired vision have been examined and reports made back to Club officials.

Cards are being delivered to parents now so they may know just what the needs of their children are and can then have them remedied. This service is free to the children and in view of the absolute need of good vision in school and for good health is a worth while project on the part of this Service Club and we congratulate them for it and hope it can be continued.

BOOKS WANTED FOR SERVICE MEN

Sponsored by the Rotary Club a drive is being made to obtain books for the men and women of the armed services. Letters are being sent out to householders when the books will be gathered up. It is hoped this drive will be supported 100 per cent by Raymond people.

If you have a few books you would like to contribute from amongst those you have finished with you can hand them to any Rotarian and he will see that they are turned into the Pool. Thank You.

TRAINING EMPIRE PILOTS FOR THOSE

Victory - Deciding Seconds

WHEN INSTINCT MUST TAKE COMMAND !

Here is a Link Trainer, opened, showing a student pilot being instructed in what to do and how to do it.

In the tense moments of a dogfight when earth and sky flash by repeatedly in a dizzy kaleidoscope, action is too fast for thinking. Instinct must take command. But for Victory, that instinct must be trained to do the right thing in the right way. Such training is given under the Commonwealth Air Training Plan through a machine called the Link Trainer.

This machine reproduces almost every possible flying condition. In absolute safety it puts future pilots through almost every flying manoeuvre. Eager Crusaders of the

Skies are trained to meet instantly the unexpected . . . and meet it correctly in those fractions of a second when even destiny pauses.

Link Trainers have more than a score of delicate, sensitive instruments that record and chart every motion of the machine. These instruments are electrically operated. And in many of the Commonwealth Air Training Centres throughout Alberta the electrical energy for such vital work is supplied by this Company — reliable, dependable power on duty 24 hours a day and every day.

Electricity is Helping to Give the Victory Impetus to the Commonwealth Air Training Plan.

WEEKLY LETTER

WHEAT FOR FEED

Wheat is no longer a free-living selling cash crop and in order to get returns for their product many farmers are being forced to dispose of their wheat thru live stock. Experience and experiments have shown that wheat is a valuable live stock feed. Yet the correspondence received at this Station indicates that there are many farmers who are not conversant with its use for this purpose. Therefore, it may be of interest and value to emphasize a few facts regarding this feed.

Wheat is more palatable to most classes of stock than either of the other three grains commonly grown in the west and particularly better liked

than barley or rye. This palatability can be reduced seriously by grinding the grain too finely so that a large portion of flour is formed. This flour has a tendency to form a pasty mass when it is consumed and may even cause digestive disturbances. Rolling or coarse grinding therefore is indicated for most satisfactory results.

Wheat is lower in fibre than either barley or oats, especially the latter, and consequently is not a good single grain for starting cattle or lambs on feed. However, it has a high value as a fattening feed and can form the greatest part of the finishing ration for these two classes of stock. A little more care is required in feeding wheat heavily as lambs especially may go 'off feed' on heavy wheat feeding. A mixture of

Stephen Wood Wins Medal

Edmonton, Alberta.

November 19, 1942

Dear Stephen:

I have the honour to advise you that His Excellency, the Earl of Athlone, has donated bronze medals for competition in connection with the Grade IX Departmental Examination of Alberta for the year 1942. A medal is being awarded to one student prepared in the Taber and Lethbridge Divisions, and it is with pleasure that I inform you that this medal is being awarded to you as the candidate having achieved the highest standing on the Grade IX Examinations.

Please accept my congratulations. This success means that we shall be expecting outstanding work on your part during your high school career.

It is requested that you forward to the Department an acknowledgement of this medal in your own handwriting for transmission to His Excellency, the Governor General.

The medal is being forwarded to your address under registered cover.

Minister of Education.

Yours sincerely,
 William Aberhart

RENEW YOUR RECORDER

three parts wheat to one part oats (or barley, if oats are not available) is more desirable than straight wheat.

In the ration of dairy cows wheat can be used quite satisfactorily. At this Station wheat constitutes one-third of the grain ration, and the ration if properly supplemented, the results will be quite satisfactory. It should be recognized that, though wheat is higher in protein than the other grains, some animal protein supplement should be used for most efficient utilization of the feed. Furthermore, a properly supplemented ration will produce faster gains, a more desirable carcass, and greater vigour and disease resistance.

One other point requires attention. Wheat weighs more for a given volume than either barley or oats. Consequently in mixing a ration the proportions should be determined by weight rather than by measure.

A STATEMENT

about

BUTTER

In spite of the fact that in some Canadian cities butter supplies recently have not been sufficient to meet the greatly increased demands, the situation does not constitute an emergency; nor is it as serious as some people seem to think. There are two main causes for these temporary and local shortages:

For the past year we have been consistently using 10% to 15% more butter than in normal times—with consequent disturbance to the distribution of our butter supplies.

Many people have been buying more butter than they currently need.

The limited nature of the present shortage is shown by the fact that if every home would reduce its consumption of butter by only one ounce per person per week (for the average home this means a quarter of a pound a week)—or if we reduced our national consumption to the peacetime rate—the shortage would soon disappear.

There is no Reason for Panic Buying

It is unpatriotic and unnecessary for housewives to rush out to beat their neighbours to the nearest grocery store. Butter will not be rationed to meet the present situation. Butter production is actually above normal for this time of year. The Board itself is taking special action which it is believed will speedily restore normal supplies in retail stores.

These supplies will however be adequate for normal consumption, if housewives in all parts of Canada co-operate.

You can help in these ways:

HOW TO SAVE BUTTER

AT MEAL-TIME

1. Use butter only for spreading on bread.
2. Never use butter just out of the refrigerator. Wait until it is soft enough to spread easily.
3. Add a small amount of milk when creaming butter for sandwiches.

IN COOKING

1. Do not use butter in baking and cooking, when lard, shortening or meat dripping can be used.
2. Use "level" measurements of butter. Guesswork means waste!
3. When adding cheese to a cream or white sauce, use only half amount of butter stated in recipe.
4. Use paper wrappings from butter to grease baking dishes.
5. Do not use butter for re-warming vegetables.
6. Serve meat gravy to avoid the use of extra butter on potatoes.
7. When adding butter to vegetable dishes, add it sparingly. Do not melt it and then pour on.

Scrupulously avoid waste and extravagance. Waste is wrong at all times. In time of war it is sabotage.

Reduce present consumption of butter by at least one ounce per person per week—(for the average home this means a quarter of a pound a week.)

Do not buy more than is needed for immediate use.

FARM MACHINERY

REPAIRS

It has always been the responsibility of farm implement distributors to maintain an adequate supply of repair parts in stock. As machines change from year to year, the task of keeping supplies on hand has increased with the passage of time. Some distributors have been keeping repair parts for machines sold 50 years ago.

The war is ending all this. Distributors are now required to estimate at the beginning of the year the repair parts that will be needed for the ensuing season. The result is sure to be that there will be a shortage of certain parts. The far-sighted farmer will protect himself by checking his machinery over immediately and placing orders for required parts with his local dealer.
